

## Verbatim launches dual motion sensor batten luminaire with emergency backup mode

**Charlotte, NC, November 10, 2016** – Verbatim expands existing line of linear fixtures with the introduction of their LED Batten Luminaire with Dual Motion Sensors and Emergency Backup. This batten fixture provides 3000lm of crisp, clear light at 26.5W when motion is detected, and dims to 40% output when it isn't, providing impressive energy savings compared to standard fluorescent fixtures without occupancy controls. An integrated long life battery, including test switch, provides functional light for a minimum of 90 minutes in the event of power loss.

The Verbatim LED Batten with Emergency Backup is DLC Listed for stairwell and passageway luminaires, and features adjustable dual motion sensors providing bi-level operation, ideal for intermittent traffic areas, such as stairwells, parking garages, and more. UL Listed and UL924 compliant, it can be used in conjunction with the 4 ft. LED Batten Luminaire with Dual Motion Sensors for a typical mixed use installation. The Verbatim Batten Luminaire with Emergency Backup has a heavy-duty, powder coated, galvanized metal housing and the option for surface or suspended chain installation. Backed by a 5-year limited warranty, this batten fixture has an estimated design lifetime of 50,000 hours, reducing maintenance costs and saving money.

### About Verbatim

For over 40 years, the Verbatim brand has been recognized for its dominant role in the consumer electronics industry. We have a strong reputation for performance, compatibility, and quality, which has led the Verbatim brand to global market leadership. Backed by the technology developed by our parent company, Mitsubishi Chemical Holdings Company (MCHC), Verbatim has a growing lighting portfolio, including our broad range of LED retrofit lamps, and our continuously expanding line of LED fixtures. We strive to enhance the quality and experience of light, while reducing lighting's impact on our environment.
