

Verbatim launches modular downlight series with interchangeable trims

Introducing the Verbatim Trimflex Downlight Series – high-quality downlights with interchangeable trims to match any aesthetic

Charlotte, NC, January 11, 2017 – Verbatim is proud to announce its latest addition to its LED luminaire collection – the Trimflex Downlight Series. Verbatim Trimflex downlights are accompanied by high-quality, interchangeable trims, allowing for the ultimate in customization.

Upgrade the look of your home or business with Verbatim Trimflex LED downlights with modular trims. These downlights are attractive, high-efficiency solutions that allow users to customize their downlights with several high-quality trim options designed to match any aesthetic.* Trimflex modular downlights are designed with a deeply recessed, 90 CRI light source that minimizes glare and renders illuminated colors with great accuracy. Trimflex trim accessories are made of durable cast or spun aluminum and have threaded bases for simple and secure attachment to the light source module. These stylish, retrofit LED fixtures are easy to install and fit most standard recessed housings. Backed by Verbatim’s 5-year limited warranty, Trimflex downlights have an estimated lifetime of 50,000 hours, resulting in reduced maintenance and replacement costs when compared to incandescent lamps.

About Verbatim

For over 40 years, the Verbatim brand has been recognized for its dominant role in the consumer electronics industry. We have a strong reputation for performance, compatibility, and quality, which has led the Verbatim brand to global market leadership. Backed by the technology developed by our parent company, Mitsubishi Chemical Holdings Company (MCHC), Verbatim has a growing lighting portfolio, including our broad range of LED retrofit lamps, and our continuously expanding line of LED fixtures. We strive to enhance the quality and experience of light, while reducing lighting's impact on our environment.
